

# Residential ENERGY EFFICIENCY Rebate Program & Heat Pump Financing Program

Revised 10-1-2018

Southwest Tennessee Electric EMC and TVA have partnered to offer you an opportunity you will not want to pass up. eScore is a residential energy efficiency program that provides you, our members, with a clean path to make your home as energy efficient as possible. The program allows you to make qualified energy improvements at a pace you can afford. eScore provides a home energy scorecard that gives you a simple path for a single family homeowner to score a perfect 10 by completing a list of energy efficient improvements.

Participate in eScore and save future energy dollars,  
improve the value of your home and receive cash incentives!

**If you are a Southwest Tennessee EMC member, own a single-family residence, and wish to participate in the eScore program, you have two options in which you can participate:**

- 1** You can register for eScore at [www.2escore.com](http://www.2escore.com) and call your local Southwest Tennessee EMC member service center. You may choose to have an evaluation performed on your home for a \$175 **non-refundable fee which is charged to your electric bill.**
- 2** To save the \$175 fee, you can register for eScore online at [www.2eScore.com](http://www.2eScore.com), then access the portal to find a contractor through the Quality Contractor Network (QCN). You contact the QCN to schedule work performed. There will not be a charge by Southwest Tennessee EMC for this service.

The work must be performed by one of our certified Quality Contactors. You will receive cash incentives after one of our qualified inspectors performs a site visit. This site visit will take approximately one hour at your home.

**Once the site visit has been performed, you will receive:**

- Your rebate based on attached rebate schedule (see back)
- The eScore of your home from 1-10 (10 being the most efficient)

For more information, please call your Southwest TN EMC service center.
